

# I.T. Support For **Your** Office

## Information Technology Systems Support Division

I.T. Systems Support Division provides customers with high quality goods and services at competitive prices. We have a team of computer and networking specialists with the skills and desire to provide the best in customer service, coupled with the latest technology in industry advances. Our Information Systems Support Division was created to provide service for our customers in two ways. First, provides service when a customer purchases a copier, printer or fax machine that they desire to connect to their local area network. Secondly, this division offers onsite sales, service and consulting for all of our on our customers' computer and network questions.

United Imaging offers network planning, purchasing, installation, and maintenance. We are authorized to sell and maintain products from a large variety of vendors, so that we can find the solution that best fits your needs. With over twenty-six years of working experience, our Information Systems Division team has a vast bank of knowledge and resources available to help you. From servers to workstations, from networking cabling to routers and switches, we are proud to offer our services as a Full Office Solutions Provider.
