What is Managed Print Solution?

Managed Print Solutions are designed to provide customers with a cost effective single point of contact. Managing their entire print environment from one interface. The program includes

supplies, parts and service for maintaining a user's fleet of copier and printer equipment. Repair and service is provided in a seamless solution to customers. A professionally staffed helpdesk, web based trouble shooting and dispatch capability is also available to support the MPS helpdesk. United Imaging MPS gives you control of your entire fleet of network devices. You view real time data and TCO (total cost of ownership) per device.
