# SUSTAINABILITY

“

THE LONGER OUR PRODUCTS ARE USED  
THE LESS OFTEN THEY NEED REPLACING

”

## Green savings and Responsibility.

We work with many companies that produce products which use high amounts of recycled content.

We carry a full line of MSE and Innovera brand imaging supplies that are environmentally friendly. They conserve nature's resources by reusing certain non-wearing plastic and metal components from spent OEM cartridges while providing the highest quality and a 100% satisfaction guarantee.

Many of our product manufacturers have even achieved “label-free” status under the EPA's regulations concerning ozone depleting chemicals. Our corporate brands include product lines with active memberships in voluntary programs such as the U.S. Green Building Council, the nation's foremost coalition of leaders from industry and government working to promote buildings that are environmentally responsible, portable, and healthy places.

We carry brands engaged in achieving GREENGUARD Indoor Air Quality Certification. We also offer a full range of office equipment that is Energy Star certified. These products can conserve up to 75% of electricity compared to standard models by powering down when not in use.
